Arena Mobile

Maps, sync and precise positioning for field teams

Open Foris · November 2026

2026 AT A GLANCE

A year in the field

53

releases

from v2.2.4 to v2.10.7

5

headline features

in the in-app “What’s new”

2

platforms

Android and iOS

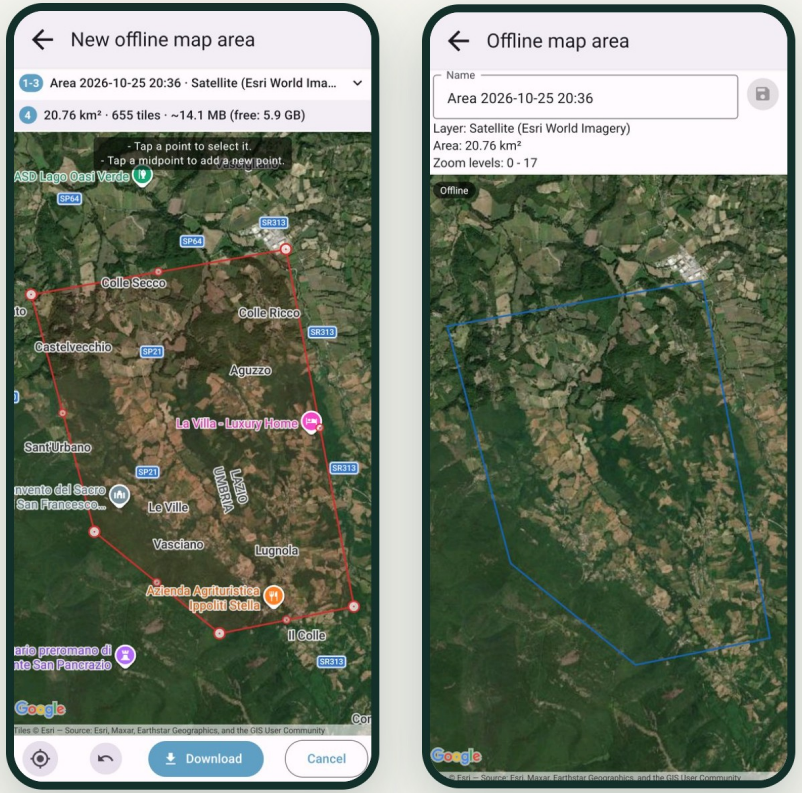

Arena Mobile · collect data offline in the field and sync it with Arena

Offline maps: the map comes along

Ready before you leave

Open **Offline maps** and add the area you need: it works without a connection.

- ✓ Draw the area on the map
- ✓ Satellite or other base layers
- ✓ Georeferenced PDF maps on top

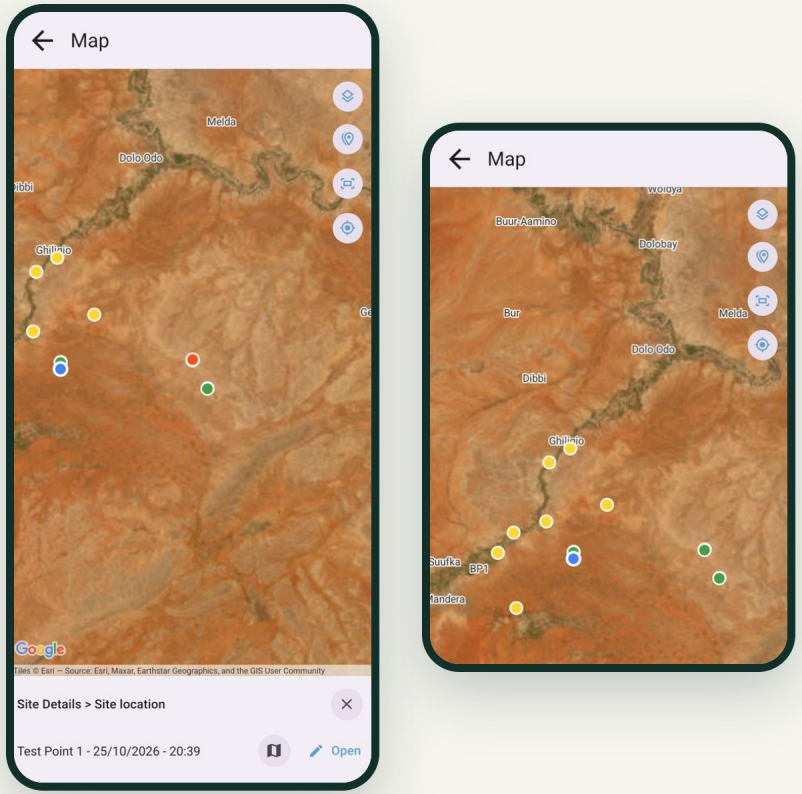

ARENA MOBILE • MAPS

Records on the map

See where you have been

Tap the **map** button in the records list.

- ✓ Sampling points, visited or not
- ✓ Coordinates and position tracks
- ✓ Tap a point to open its record

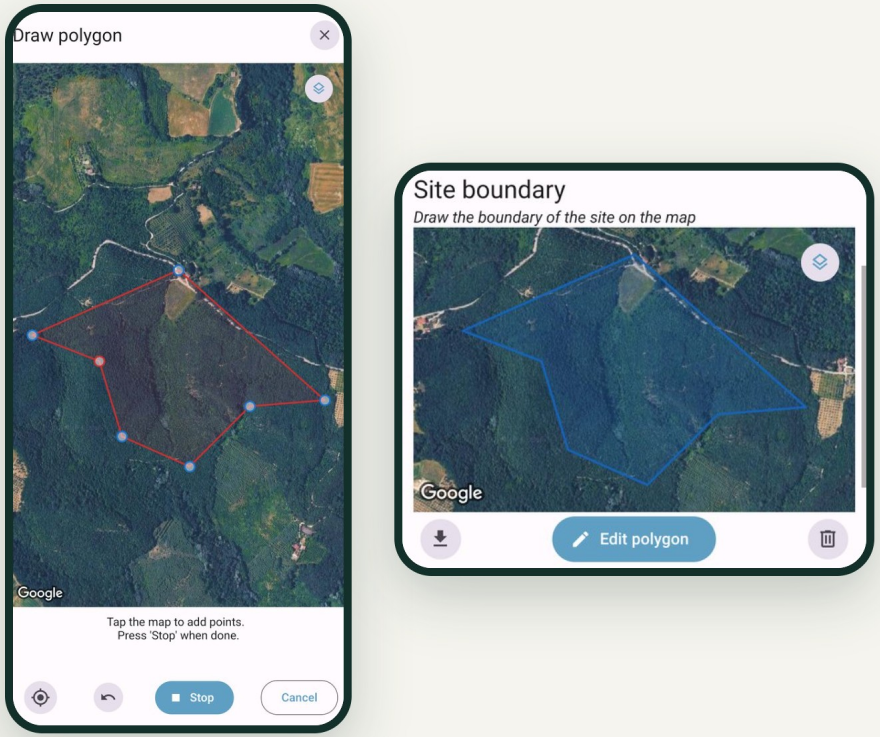

ARENA MOBILE • DATA ENTRY

Draw polygons in the field

New geospatial attribute

Map the boundary of a site, a plot or a stand.

- ✓ Tap the map or walk the boundary
- ✓ Drag points to fix the shape
- ✓ Download it as GeoJSON

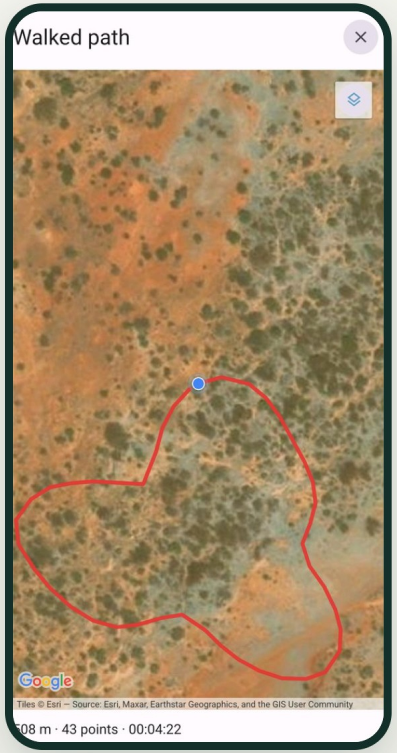

ARENA MOBILE • DATA ENTRY • EXPERIMENTAL

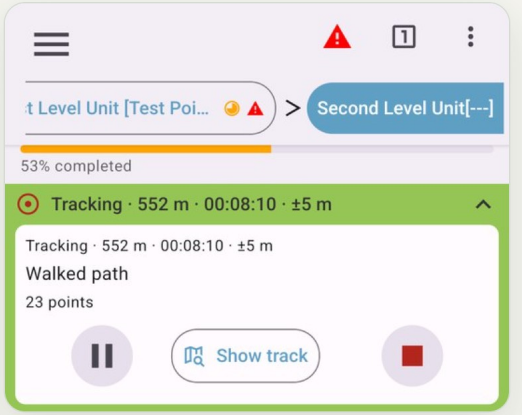

Position tracking: record the path you walk

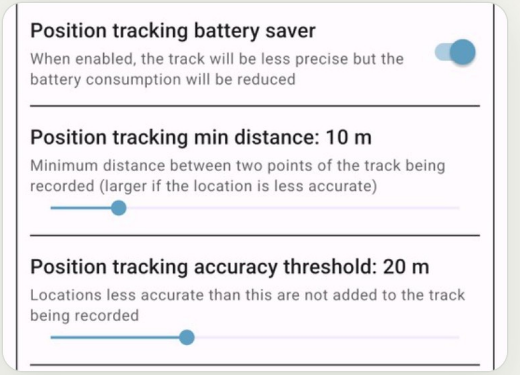

Your route, saved in the record

A geospatial attribute marked **Position tracking** in Arena records the device's path while the record is filled in.

- ✓ Start, pause, resume and stop
- ✓ See the track on the map
- ✓ Accuracy, distance and battery saver

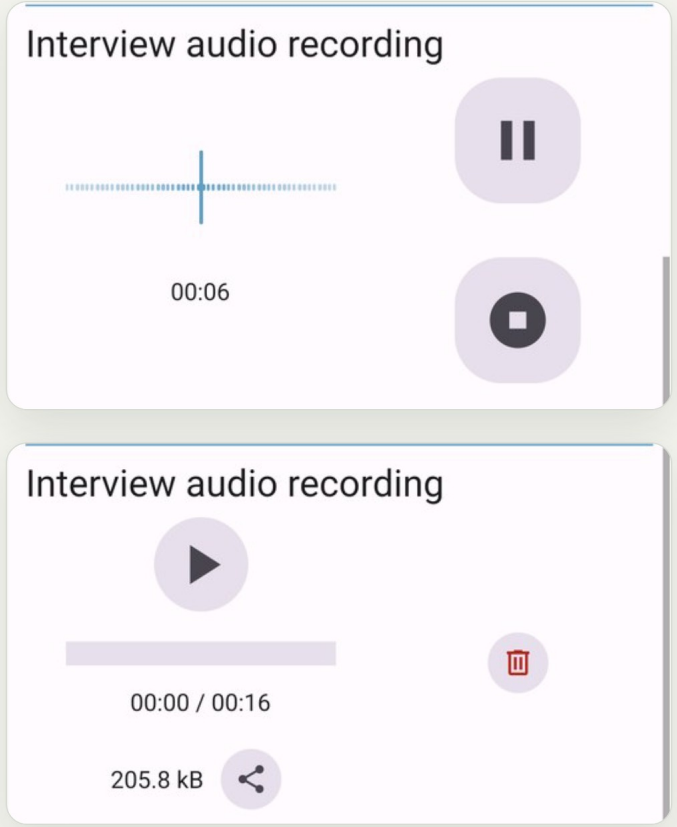

Audio attributes: record in the field

Record audio in the form

The new **audio** file type: record an interview or a sound inside the record, or pick an existing file.

- ✓ Record, pause, resume and stop
- ✓ Play it back, share or delete it
- ✓ Shown only when relevant, e.g. after consent

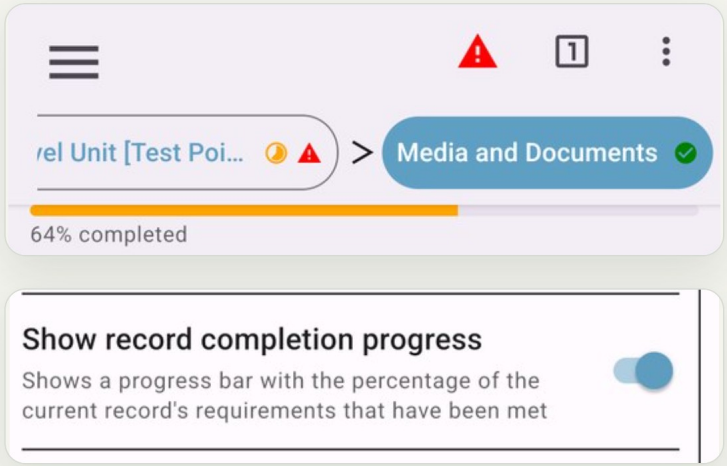

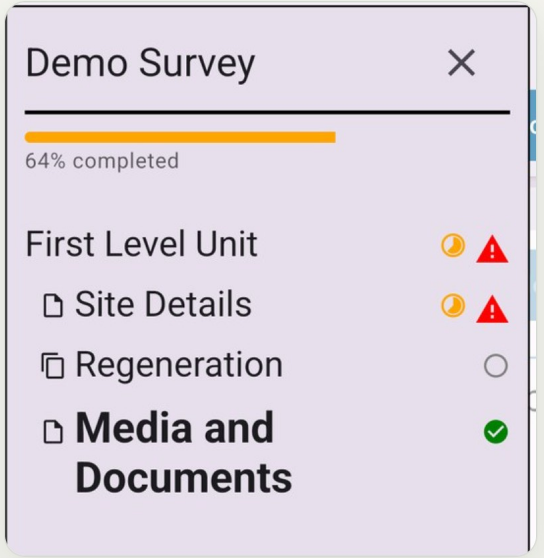

Record completion at a glance

See what’s left to do

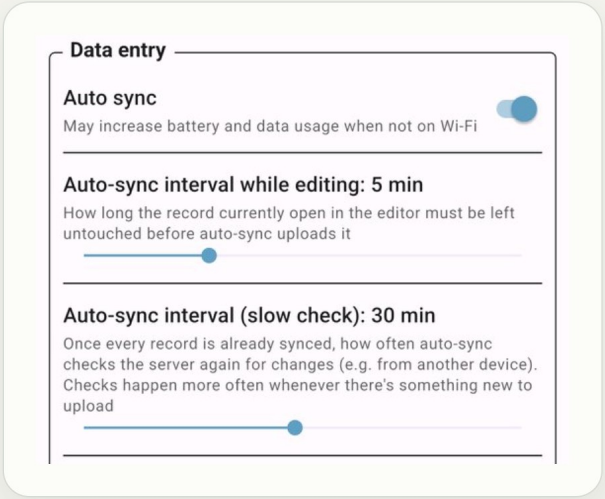

A progress bar shows how much of the record’s requirements are already met.

- ✓ Percentage for the whole record
- ✓ Status icon for each page
- ✓ Can be turned off in Settings

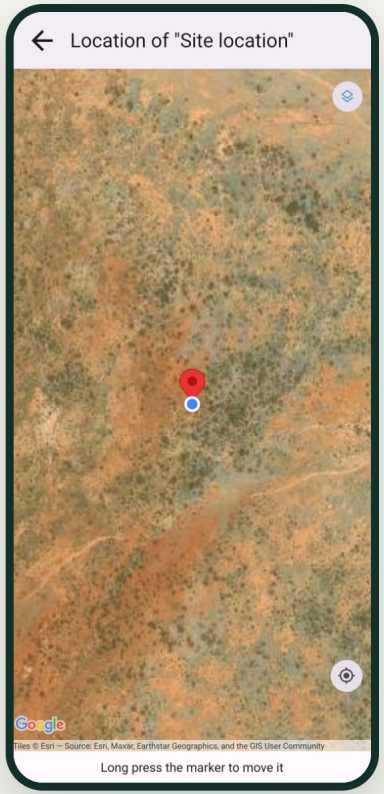

Sync on its own, locate more precisely

Automatic data sync

New and changed records upload in the background whenever the server is reachable.

External GPS devices

Pair a Bluetooth receiver (e.g. Bad Elf) for better accuracy; Auto falls back to the internal GPS.

ARENA MOBILE • AND MORE

Many smaller wins for field teams

- Login with a QR code from Arena
- Two-factor authentication
- User groups, read-only access to other groups
- Key attributes locked while editing
- Required-if, editable-if, visible-if
- Re-validate records from the list
- CSV export, attached files included
- Navigate to a point with radar view
- Rotate pictures in file attributes
- Cards view, pick entity list columns
- Survey files (e.g. areas of interest) downloaded
- “What’s new” carousel

Thank you
